

QUALITY AND ENVIRONMENT POLICY AND MANAGEMENT COMMITMENT

Since 2005, TESCO offers a wide range of services related to industrial and environmental engineering in the fields of Energy, Environment and Security as well as Water and Infrastructure.

In a constant concern to continuously improve the quality of its services and to preserve its environment, our company has decided to set up a Quality and Environment Management System, in accordance with the requirements of the international ISO standards 9001 version 2015 and ISO 14001 version 2015.

We are determined, through this System, to achieve the objectives that we have set namely:

- Satisfy our customers and the relevant interested parties for our Quality and Environmental Management System.
- Optimize the quality of our services and the functioning of our processes.
- Comply with all regulatory and legal environmental requirements.
- Ensure the continuous improvement of our Quality and Environment Management System.
- Continuously develop the skills level of our staff in order to improve the quality of our services.

To this end, we are committed to providing the necessary resources to ensure the implementation and operation of the Quality and Environment Management System.

For this purpose, the General Management has appointed a Quality and Environment Manager who will be responsible for participating in the monitoring of the system and its improvement and for keeping the General Management informed of its development and effectiveness.

As this is a collective process, we are counting on the involvement and collaboration of all staff to meet the challenges.

Tunis, October 1st, 2020

Mourad KAABI
CEO
